All artworks in the Thesis by Perdita Phillips are photographed by, and copyright © of, Perdita Phillips.
fieldwork/fieldwalking is a contemporary art project exploring practices of walking and science in the field. It explores the themes of walking and fieldwork in art, and as art. Whilst the sociology of science in the laboratory has been well theorised, less has been said about the field in the natural sciences. And, equally, the most recent and provocative walking art is found in urban areas, in a fabric dominated by the patterns of human settlement. How could new walking art be made in non-urban places? The project set out to investigate how these two, fieldwork and walking, could be combined in artwork. The research question was: in the common ground shared between art and science, what are the connections between fieldwork and walking in the field? The project explored this and five sub-questions through photography, video, and the creation of installations and sound art walks. Much of the research revolved around one field location, the walkingcountry in the Kimberley of Western Australia that was visited six times over different seasons from 2004 to 2006. Activities included walking and general immersion in the place, scientific and artistic ‘fieldwork’ and the observation and documentation of the work of scientists at the site and in the Kimberley.

Non-urban areas can offer intense and specific experiences with heightened materiality and direct engagement with nonhuman agents. This was borne out in the fieldwork undertaken in the project. However the artworks created are also set in contrast to the work of other walking artists such as Hamish Fulton and Richard Long that are often based on sublime wilderness experiences. Based on my experiences I formulated and applied the concept of ‘ordinary wilderness’: much of one’s time in the field is involved in pragmatic and bodily encounters. Some of the aesthetic experiences are local and ephemeral. Wildness and the delight of wonder are more appropriate than the fear and awe of the sublime. fieldwork/fieldwalking draws together threads from sources as diverse as recent scientific ecology, Ric Spencer’s (2004) conversational aesthetics and non-representational theory in human geography to make art that questioned representational strategies and explored an expanded model of artworks where the relationships between the artist, the audience, the environment and the material art object are of equal importance.

A significant issue was how to creatively transform the experience of elsewhere (the field) into artworks in a gallery. In the sound art walk To Meander and back (strange strolls, Moores Building Contemporary Art Gallery (MBCAG), 2005) the strategy was to fold and imbricate the walkingcountry, the gallery in Fremantle, and the space in-between together. This artwork also sought to reconcile the ‘emptiness’ of Euro-Australian belonging by encouraging via sound and silence an understanding of place that is more living, changing and performative.

Other artworks included Zoo for the Species at the National Review of Life Art (Midland, 2003) and works in the solo exhibitions Four Tales from Natural History (Perth Institute of Contemporary Art, 2004), Semi (Spectrum Project Space/Kurb Gallery, 2004) and fieldwork/fieldwalking (MBCAG, 2006).

Keywords: science and art, walking, fieldwork, place, belonging, nonhuman, feral, wildness, wonder, sound art, conversational aesthetics, non-representational theory, processes of silence, the walkingcountry, Kimberley, Australia, site-specificity, FutureNatural.
Declaration

I certify that this thesis does not, to the best of my knowledge and belief:

(i) incorporate without acknowledgement any material previously submitted for a degree or diploma in any institution of higher education;

(ii) contain any material previously published or written by another person except where due reference is made in the text; or

(iii) contain any defamatory material

I also grant permission for the Library at Edith Cowan University to make duplicate copies of my thesis as required

Acknowledgements

I am grateful for the kindness of forty-two members of the Western Australian Naturalists Club who generously allowed me to photograph their boots.

I would like to acknowledge the assistance of Professor Dale Roberts, School of Animal Biology, Faculty of Natural and Agricultural Sciences, University of Western Australia for the use of a night vision scope.

The participation of geologist Alvin D’Almeida was a key part of the fieldwork/fieldwalking project. I am extremely grateful for Alvin’s charm and generosity, passion, patience and good humour as I sound recorded, photographed and videoed the geological mapping of the walkingcountry.

I would like to acknowledge the assistance of the Thalie Partridge PhD student at the Fire, Earth and Water Research Group, Department of Biological Sciences, Macquarie University, Sydney and Mike Freeman, Senior Land-Use Planning Geologist, Geological Survey of Western Australia, Department of Industry and Resources, Western Australia. Both participated in interviews about their work. A small survey of field scientists distributed by email also attracted twenty nine anonymous respondents.

As well as the contributing artists and all those who took ‘strange strolls’ specific mention needs to be made of Nyanda Smith, Minaxi May and Ric Spencer who helped especially with the strange strolls sound art walking project.

The Exegesis was substantially improved by the thoughts and editorial suggestions of Professor Andrew Taylor, my supervisor Dr Nien Schwarz and Nyanda Smith.

A general thank you goes out to all the University staff who assisted, and to the many technicians, curators and gallery staff, colleagues, family and friends who helped in innumerable ways along the journey.

This project would not have been possible without the generous permission and assistance of the Garstone family on whose land part of the walkingcountry is found.

1.9 The route taken
1.10 To depart

**2.0 Artworks exhibited as part of the fieldwork/fieldwalking Thesis**
3.0 Exegesis  A guide to the fieldwork/fieldwalking project

3.1 Waiting for cane toads
   3.1.1 Welcome to the walkingcountry
   3.1.2 Kimberley ecology
   3.1.3 The Kimberley experience
   3.1.4 Regional art
   3.1.5 Cane toads
      3.1.5.1 The Kununurra 2005 Community Cane Toad Forum
      3.1.5.2 The Fall
      3.1.5.3 What is the connection between cane toads and belonging?
         3.1.5.3.1 Feral Art
         3.1.5.3.2 Cane Toads–R-Us
      3.1.5.4 Why do some people in a society care about the effects of cane toads whilst other people in a society don’t?
      3.1.5.5 How do we cope with hybridity?: Situations full of uncertainties and with imperfect answers?
         3.1.5.5.1 The new ecology
      3.1.5.6 How do we decide to value some things more than others?
      3.1.5.7 What is the position of science in my work now that I am not a scientist?
   3.1.6 Waiting for cane toads
   3.1.7 Conclusion

3.2 To wild
   3.2.1 Four Tales from Natural History
   3.2.2 Wilderness
      3.2.2.1 Walking and the wilderness landscape
      3.2.2.2 Historical wilderness debates
      3.2.2.3 Recent wilderness concerns
   3.2.3 to wild
      3.2.3.1 The word: wild
      3.2.3.2 Lone Twin
      3.2.3.3 The wild as “liveness”
      3.2.3.4 Negative wild?
      3.2.3.5 Passionate wilderness
      3.2.3.6 Wild: the boundary state
      3.2.3.7 The transformational wild
   3.2.4 Rethinking the relationship
      3.2.4.1 Sublime
      3.2.4.2 Wonder and walking
   3.2.5 Wild walking
      3.2.5.1 Non-urban walking: solitariness, endurance, leisure and consumption
      3.2.5.2 A continuum of walking practices
   3.2.6 Wild science
      3.2.6.1 On tropical nature
      3.2.6.2 Wondering and science
4.0 Thesis Conclusion
4.1 The research question
4.2 Major findings

4.2.1 Fieldwork and fieldwalking that is art and science
4.2.2 Walking as bodily and social practice
4.2.3 FutureNatural
4.2.4 Ordinary wilderness
4.2.5 Herethere
4.2.6 Conversations
4.2.7 Silence, listening and belonging
4.2.8 Contemporary practice
4.2.9 Boundaries of an artwork expanded

4.3 Further works
4.4 To make tracks
